Arun, "Electronics" is written as a monolog between teacher and student in an attempt to make the language as simple as possible. The various diagrams and oscilloscope plots will help students correlate the theory they learn in the class room with observations they make in their lab experiments. Thumb rules of circuit design have been included where-ever possible and various laws of physics behind various devices have been discussed. The chapters in the book can be divided into sections explaining modeling, test equipments and circuit elements which are building blocks of a power supply.
